

**SUSPENSION OF SERVICE**

Water User Name \_\_\_\_\_ Telephone \_\_\_\_\_

Address \_\_\_\_\_

Type of Water User:    Headquarters                      Livestock                      Seasonal Cabin  
Legal Descriptions:    Sec \_\_\_\_\_    Twp \_\_\_\_\_    Range \_\_\_\_\_    Tap \_\_\_\_\_

Meter Readings: \_\_\_\_\_ Date: \_\_\_\_\_

As per regulation 205.III Service disconnected for non-payment of bills shall constitute a disconnection and will be restored only after bills are paid in full including the accumulated monthly minimum bill since the date service was discontinued, any requested deposits are paid, provided water service still remains available, and reconnection charges, in the amount established in the rate schedule, are paid for each meter reconnected. Service will only be restored if water service still remains available as determined by the system.

IV. When water service is disconnected at the request of the water user, the water user waives his/her rights to membership in the system and rights to water service at the meter location in question. Any application for water service at a later time will be considered and treated as a new membership. The location will only be served if it is determined that water capacity exists to serve the location, and if the user pays a reconnection cost of the amount of minimum bill accumulated since the time of disconnection of the meter at the location plus actual reconnection costs (also see policy #306). If the meter is disconnected after the five (5) year minimum charge, the meter will be re-connected at a reconnection cost of the amount of minimum bill accumulated since the time of disconnection of the meter at the location plus actual reconnection costs (also see policy #306).

302.IX Every applicant for service shall execute an agreement to pay (5) years' minimum charges once water is available for use by the water user. The agreement states all applicants shall faithfully abide by the Articles of Incorporation, By-Laws and Rules and Regulations of the System as a condition of membership and in consideration for the services provided for by the System. All applicants, as a part of the application, shall agree to allow the System all rights-of-way, easements, and such access to the property of the applicant as is reasonable and necessary to provide service to the property of the applicant and other users of the system.

302.V. The System may reject any application for service when the applicant is delinquent in payment of bills incurred for service previously supplied at any location. When the premises of the owner have been served water, and have not paid for the service, the System shall not be required to render service to anyone at said location where the water was used, until said water bill has been paid, or until satisfactory arrangements have been made.

\_\_\_\_\_ Water users disconnected after the five (5) year minimum charges have been paid in full and no water has been used will be disconnected at \$0.00 charge and the meter will be re-connected at a reconnection cost of the amount of minimum bill accumulated since the time of disconnection of the meter at the location plus actual reconnection costs.

\_\_\_\_\_ Water users disconnected after the five (5) year minimum charges have been paid in full and water has been used will be disconnected at the disconnect charge listed in policy #204 and will be re-connected at a reconnection cost of the amount of minimum bill accumulated since the time of disconnection of the meter at the location plus actual reconnection costs.

\_\_\_\_\_ Water users who have been disconnected due to nonpayment will be reconnected only after the delinquent bills have been paid in full including any additional monthly charges from the time service was disconnected. Service will be reconnected only if service remains available at the location in question and the reconnect charges established in policy #204 have been paid.

\_\_\_\_\_ New landowner's who do not wish to continue current service will waive all rights to his/her membership in the system and rights to water service at the meter location in question. Any application for water service at a later time will be considered and treated as a new membership and will be subject to the current construction rates as stated in policy #200.

\_\_\_\_\_ Restoration of service at a location where service has been disconnected due to nonpayment will be treated as a new application for service and will be restored only after the delinquent bills have been paid in full including any additional monthly charges from the time service was disconnected. Service will be reconnected only if service remains available at the location in question and the reconnect charges established in policy #204 have been paid.

\_\_\_\_\_ Water users wishing to be disconnected before the five (5) year minimum charges have been paid in full have the option to fulfill the original contract by paying in full at the time of disconnect and will be charged the disconnect charge listed in policy #204 and will be re-connected at a reconnection cost of the amount of minimum bill accumulated since the time of disconnection of the meter at the location plus actual reconnection costs or they can waive all rights to his/her membership in the system and rights to water service at the meter location in question. Any application for water service at a later time will be considered and treated as a new membership and will be subject to the current construction rates as stated in policy #200.
